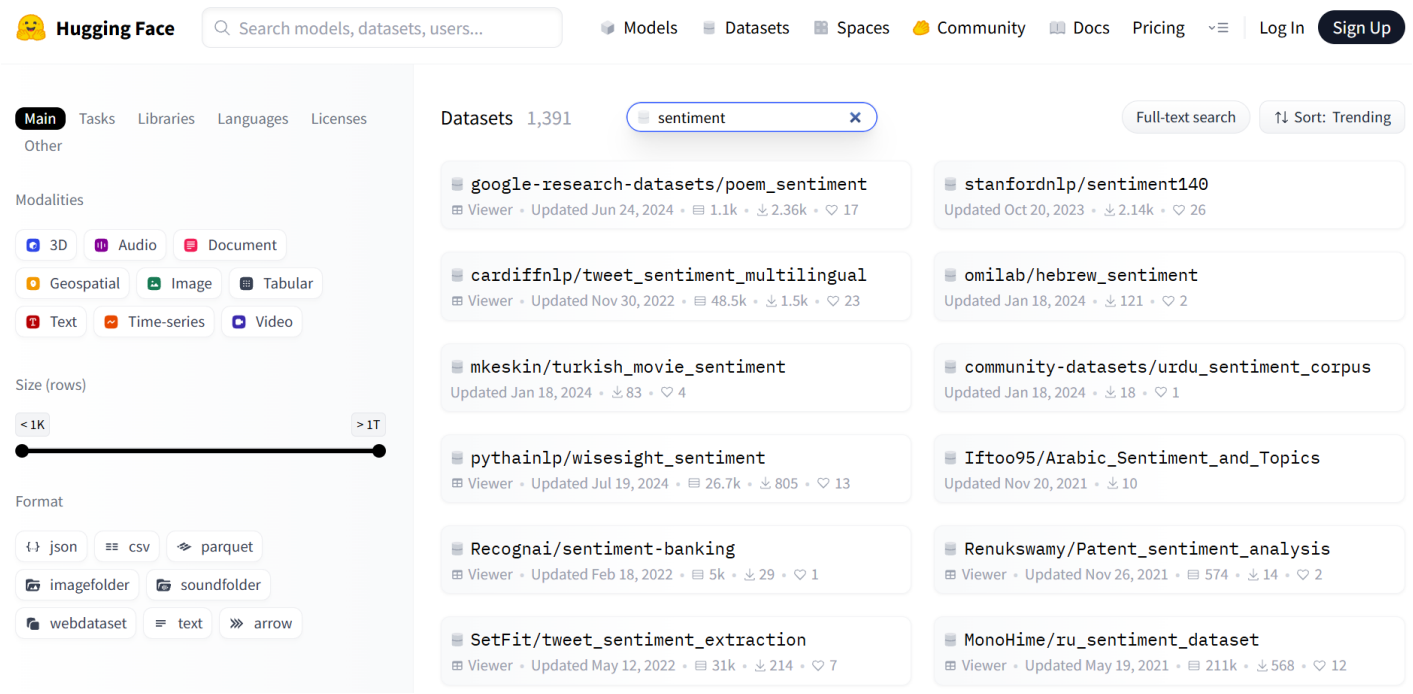
Using HuggigFace

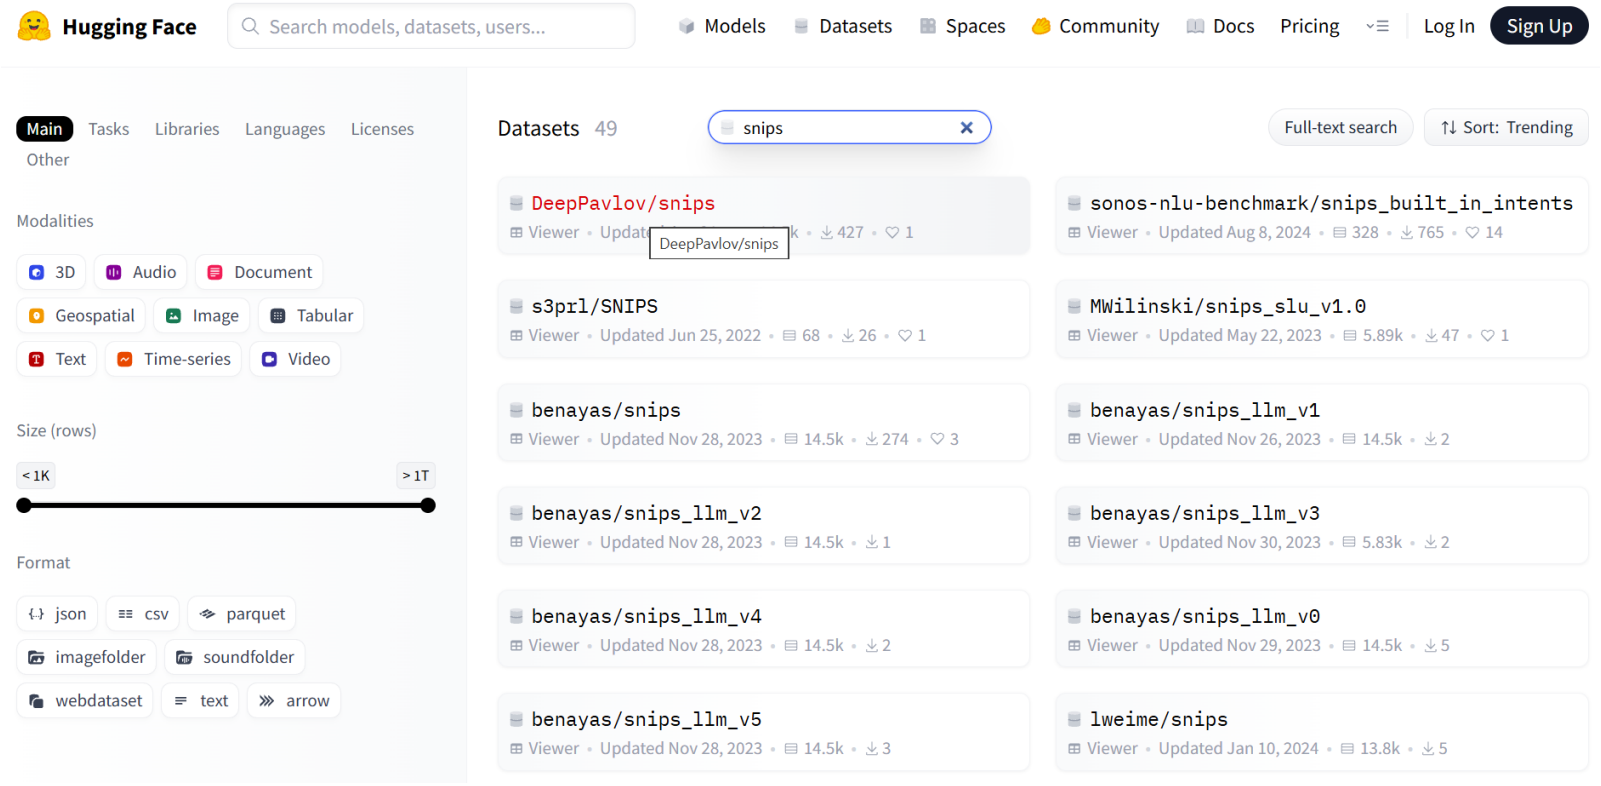
To use datasets from Hugging Face:

- Visit `https://huggingface.co/datasets`
- Search for the dataset you want. For example, try searching for `sentiment`.



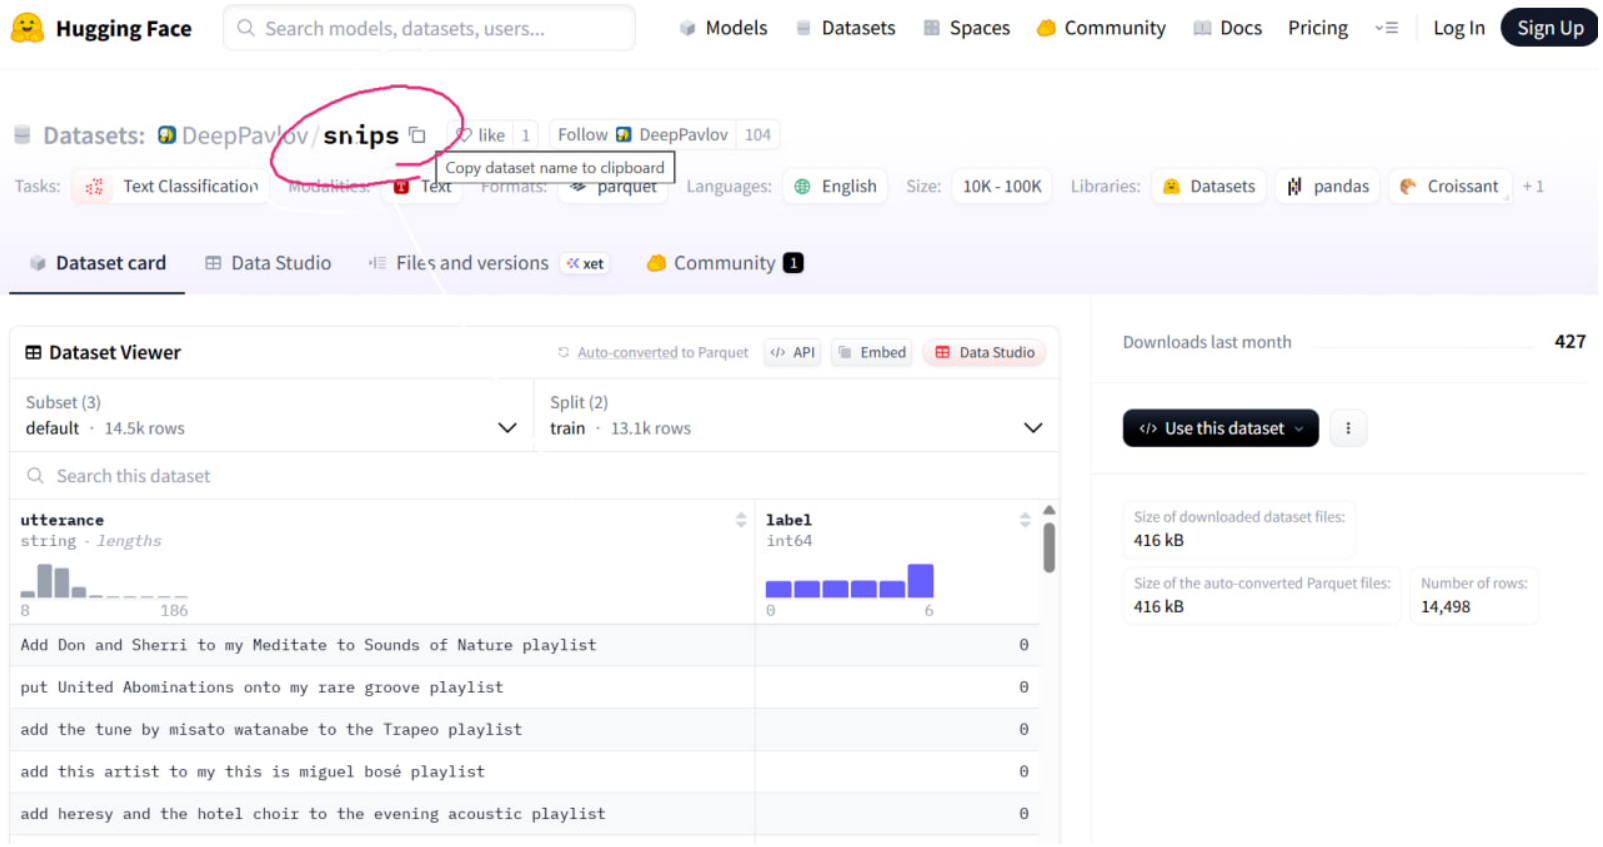
SNIPS As An Example

Let's search for snips (for intent recognition) and then choose the first one:



Copying the Name

Then you just need to copy the name:



Using Dataset in Google Colab

And paste that name in Google Colab:

```
from datasets import load_dataset

dataset = load_dataset("DeepPavlov/snips")
```

```
/usr/local/lib/python3.12/dist-packages/huggingface_hub/utils/_auth.py:94: UserWarning:
The secret `HF_TOKEN` does not exist in your Colab secrets.
To authenticate with the Hugging Face Hub, create a token in your settings tab (https://huggingface.co/settings/tokens),
You will be able to reuse this secret in all of your notebooks.
Please note that authentication is recommended but still optional to access public models or datasets.
